

2d shapes Year 3 and 4: Answers

Name the 2d shapes:

1. Trapezium

2. Rhombus

3. Pentagon

4. Parallelogram

5. Heptagon

6. Rectangle

What are the properties of these shapes?

1. Three sides, three angles, all 3 sides and angles are equal, three lines of symmetry (if equilateral)

2. Four sides. Opposite sides are parallel. Opposite sides are equal. Two lines of symmetry. Angles are equal to 90 degrees

3. Four sides. Opposite sides are parallel. All 4 sides are equal in length. Four lines of symmetry, Angles are equal to 90 degrees.

4. 6 sides. Angles are obtuse. 6 vertices, 6 angles

How many lines of symmetry do these shapes have?

1. Four

2. One
