

Sudoku Puzzle 1

The rules of the game are simple: each of the four blocks has to contain all the numbers 1-4 within its squares. Each number can only appear once in a row, column or box.

The difficulty lies in that each vertical four-square column, or horizontal four-square line across, within the larger square, must also contain the numbers 1-4, without repetition or omission.

Every puzzle has just one correct solution

	1	4	
	4	2	
	2	3	
	3	1	

Answer

2	1	4	3
3	4	2	1
1	2	3	4
4	3	1	2
