5. He could see shelves stacked with bubble gum popping candy voice changers and dinosaur food.
6. As the door opened he could hear loud bangs popping noises laughing and circus music.

## Yellow Challenge

### Can I use commas in a list?

Place commas in the paragraph below to separate items in lists.

George waited patiently outside the shop. "When is it going to be my turn?" he wondered. Just then, he saw a girl leave the shop with a bagful of goodies. She stopped close to George to talk to another child in the queue. George peered into her bag. She had 17 chocolate pencils 10 icicle pops 3 gift boxes and 9 mouth poppers! "She is never going to eat all of those," he thought. As the door swung open again, he could see shelves stacked with bubble gum popping candy voice changers and dinosaur food. Even when the door was closed he could hear magical sounds escaping through the open windows. He could hear loud bangs popping noises laughing and circus music. Finally, it was George's turn. He was next in line to enter the shop. "Next!" called one of the shop workers as they signalled for George to come in. The worker looked odd. She was wearing stripy tights candy stick earrings and a purple fluffy jumper.

## Green Challenge

### Can I use commas in a list?

Write a paragraph about what George sees when he goes inside the sweet shop. You will need to include at least 3 different lists using commas to separate the items in each list. Think about what he might see on different shelves, inside boxes or hanging from the ceiling. Use the picture below to help you.
