

$39 + 68 =$

Fast Five

$3 \times 4 =$

$8 \times 6 =$

$6 \times 5 =$

Finish the fact family:

$24 + 6 = 30$

$_ + _ =$

$_ - _ =$

$_ - _ =$

A

B

Which line is **horizontal**?

Which numbers are **even**?

55 94 29 30

Answers on the next slide

$39 + 68 = 107$

Fast Five

$3 \times 4 = 12$

$8 \times 6 = 48$

$6 \times 5 = 30$

Finish the fact family:

$24 + 6 = 30$

$6 + 24 = 30$

$30 - 24 = 6$

$30 - 6 = 24$

A

B

Which line is **horizontal**?

Which numbers
are **even**?

55 **94** 29 **30**

Summer, Week 3, Lesson 3

Can I solve word problems?

Simon has 5 packs of sweets. There are 15 sweets in each pack. How many sweets does he have altogether?

Learning steps:

- 1) Read the question

Simon has 5 packs of sweets. There are 15 sweets in each pack. How many sweets does he have altogether?

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question

Simon has 5 packs of sweets. There are 15 sweets in each pack. How many sweets does he have altogether?

$$5 \times 15 =$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation

Simon has 5 packs of sweets. There are 15 sweets in each pack. How many sweets does he have altogether?

$$\begin{array}{r} 5 \times 15 = \\ \swarrow \quad \searrow \\ 5 \times 10 \quad 5 \times 5 \\ 50 \quad + \quad 25 = 75 \end{array}$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation
- 4) Select a method

Simon has 5 packs of sweets. There are 15 sweets in each pack. How many sweets does he have altogether? **75 sweets**

$$\begin{array}{r} 5 \times 15 = \\ \swarrow \quad \searrow \\ 5 \times 10 \quad 5 \times 5 \\ 50 \quad + \quad 25 = 75 \end{array}$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation
- 4) Select a method
- 5) Write your answer

There are 4 boxes in a classroom. Each box has 53 books in it. How many books are there in the classroom?

Learning steps:

- 1) Read the question

There are 4 boxes in a classroom. Each box has 53 books in it. How many books are there in the classroom?

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question

There are 4 boxes in a classroom. Each box has 53 books in it. How many books are there in the classroom?

$$4 \times 53 =$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation

There are 4 boxes in a classroom. Each box has 53 books in it. How many books are there in the classroom?

$$\begin{array}{r} 4 \times 53 = \\ 4 \times 53 = \\ \swarrow \quad \searrow \\ 4 \times 50 \qquad 4 \times 3 \\ 200 \qquad \qquad + \qquad 12 = 212 \end{array}$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation
- 4) Select a method

There are 4 boxes in a classroom. Each box has 53 books in it. How many books are there in the classroom? **212 books**

$$\begin{array}{r} 4 \times 53 = \\ 4 \times 53 = \\ \swarrow \quad \searrow \\ 4 \times 50 \quad 4 \times 3 \\ 200 \quad + \quad 12 = 212 \end{array}$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation
- 4) Select a method
- 5) Write your answer

There are 3 packs of apples being delivered. Each pack has 27 apples inside. How many apples are being delivered?

Learning steps:

- 1) Read the question

There are 3 packs of apples being delivered. Each pack has 27 apples inside. How many apples are being delivered?

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question

There are 3 packs of apples being delivered. Each pack has 27 apples inside. How many apples are being delivered?

$$3 \times 27 =$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation

There are 3 packs of apples being delivered. Each pack has 27 apples inside. How many apples are being delivered?

$$\begin{array}{r} 3 \times 27 = \\ \swarrow \quad \searrow \\ 3 \times 20 \quad 3 \times 7 \\ 60 \quad + \quad 21 \end{array}$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation
- 4) Select a method

There are 3 packs of apples being delivered. Each pack has 27 apples inside. How many apples are being delivered? **81 apples**

$$\begin{array}{r} 3 \times 27 = \\ \swarrow \quad \searrow \\ 3 \times 20 \quad 3 \times 7 \\ 60 \quad + \quad 21 = 81 \end{array}$$

Learning steps:

- 1) Read the question
- 2) Underline the key words/numbers in the question
- 3) Write the calculation
- 4) Select a method
