

Task 1 (Red)

Add an adverbial of time to the instructions for making a cup of tea.

1. _____, fill the kettle with the amount of water you need from the tap.
2. _____, boil the kettle and while you're waiting, place the tea bag in the mug.
3. _____, the water in the kettle has boiled, pour it into the mug. Make sure you leave some room at the top of the mug.
4. _____, using a teaspoon, stir the water with the teabag in it. Squeeze the tea bag against the side of the mug using the spoon and remove it from the mug.
5. _____, pour in as much milk as you prefer for your cup of tea and stir using the spoon.

How to Wash Your Elephant

Has your elephant rolled in mud?

Elephants need to be kept clean or they can often become unhealthy. Use this handy set of instructions to ensure you keep your pet squeaky clean.

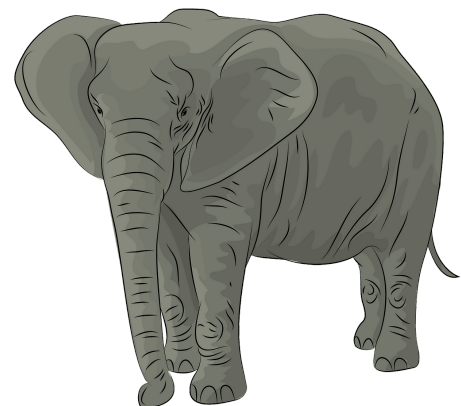

Equipment

- An extra long hose pipe (at least 10 metres)
- A set of step ladders
- A large sweeping brush with stiff bristles
- A bottle of elephant shampoo
- A pair of elephant nail clippers
- A sheet of sandpaper
- A feather duster.

Method

1. Firstly, prepare your elephant for their bathing session in an open area with plenty of space. Make sure that your animal is calm, well-fed and content. It may help to tickle their tummies to relax them if they are nervous about getting wet.
2. Next, prop up the step ladders beside your pet, otherwise it is impossible to reach the top of their body. Climb the ladders carefully as you carry the hosepipe. Use lukewarm water to completely soak your elephant's skin.
3. After that, squeeze a whole bottle of elephant shampoo which hasn't been opened onto the animal/s back. Use the sweeping brush to reach up and scrub every part of their dirty skin. Start at their back and work downwards to their feet.
4. Afterwards, rinse them off until all of the soap suds are gone. Be very careful not to let any of the shampoo drip into your pet's eyes as the pain could cause them to suddenly charge at you.
5. Now, you need to make your elephant lie down. A tasty bun with peanut butter on it may be helpful to convince them to go down to the ground. Use the sandpaper to file their toenails. As a result, you should watch out for

sharp bits of flying elephant toenail!

6. Finally, you need to gently clean your elephant's nostrils and ears using the feather duster. This can be very dangerous. Move quickly away from your elephant's trunk if they begin to shake or start breathing more heavily. You do not want to be in the firing line of a powerful elephant sneeze.

Enjoy your spotlessly clean mammal, but keep a close eye on them near any muddy puddles.

Task 3 (Green)

Read the model text and identify the following features.

Rhetorical questions

Expanded noun phrases

Adverbials of time

Imperative verbs (bossy verbs/instructive verbs)

Conjunctions (Connecting words)

If you have a printer, you can print off the model text and colour code the features. If you do not have a printer, copy the table below into your book and write the words into the correct section.

Rhetorical questions	Expanded noun phrases	Adverbials of time	Imperative verbs	Conjunctions
(Questions that do not require a direct answer)	(Adjective, noun, extra information)	E.g. Next Then	E.g. Put Scrub Place	E.g. As Because So
