

Year 3 Summer 2 Week 8
Lesson 4

Can I find perimeter of 2D
shapes?

Fast Five - Answers on the next slide.

1. $47 + \underline{\quad} = 100$

2. 496
 $+ \underline{224}$

3. $31 \div 5 =$

4. Half of 70

5. What shape is this?

Fast Five - **Answers.**

1. $47 + 53 = 100$

2.
$$\begin{array}{r} 496 \\ + 224 \\ \hline 720 \end{array}$$

3. $31 \div 5 = 6r1$

4. Half of 70 = **35**

5. What shape is this? **Square based pyramid.**

Perimeter of a shape.

Perimeter means 'the distance around the whole outside edge of a shape'. Imagine an ant walking all the way around the shape. The length he walked is known as the 'perimeter'.

Perimeter of a shape.

We can find the perimeter of a shape by **adding all the sides together.**

We can find the perimeter of a shape by Perimeter of a shape adding all the sides together or counting the sides of the squares around the edge of a shape.

Perimeter of a shape.

Therefore the perimeter is
 $5\text{cm} + 5\text{cm} + 3\text{cm} + 3\text{cm} = 16\text{cm}$

Perimeter of a shape.

We can find the perimeter of a shape by **adding all the sides together.**

Perimeter of a shape.

We can find the perimeter of a shape by **adding all the sides together.**

$$6\text{cm} + 6\text{cm} + 4\text{cm} + 4\text{cm} = 20\text{cm}$$

Perimeter of a shape.

Can you work out the perimeter of this shape? **Answer on the next slide.**

Perimeter of a shape.

Can you work out the perimeter of this shape?

Answer: $8\text{cm} + 8\text{cm} + 3\text{cm} + 3\text{cm} = 22\text{cm}$

Perimeter (P) = 22cm

Perimeter of a shape.

Sometimes we aren't given all the measurements for the sides. We can still find the perimeter...

This shape is a **square**. (*All sides are the same length on a square!*)

Use what you know about a shape to help you.

Perimeter of a shape.

Sometimes we aren't given all the measurements for the sides. We can still find the perimeter...

The perimeter is $5\text{cm} + 5\text{cm} + 5\text{cm} + 5\text{cm} = 20\text{cm}$

Perimeter (P) = 20cm

Perimeter of a shape.

Can you work out the perimeter of this shape? **Answer on the next slide.**

Use what you know about the shape to help you. *This is a rectangle so the **parallel lines** are the same length.*

Perimeter of a shape.

Can you work out the perimeter of this shape? **Answer:** The perimeter is $9\text{cm} + 9\text{cm} + 2\text{cm} + 2\text{cm} = 22\text{cm}$

Perimeter (P) = 22cm

Activity:

Red: Add together the sides of shapes to find the perimeter. Using squares.

Yellow: Add together the sides of shapes to find the perimeter. Without squares.

Green: Add together the sides of shapes to find the perimeter. Some lengths are missing.
