# What are pictograms?

Pictograms show information in the form of pictures. Each picture has a set value. We can see the information clearly and quickly with a pictogram.

# PICTOGRAMS

Key:  means 1 child

Fruit	Favorite Fruit
 apple	
 banana	
 strawberry	
 pear	
 grapes	

The key tells you how much each picture is worth.

In this pictogram, the picture showing an amount is a smiley face.

We can use this information to answer some questions.

How many children chose bananas and pears?

7 children chose bananas and 2 children chose pears. We need to find the total...

$$7+2=9$$

## Favourite Fruit

Some pictograms have half a picture. This means they are worth half the full value.

A whole pear represents 2 children so half a pear represents 1 child.

## Activity:

**Red:** Answering questions on pictograms. The value of pictures is 1.

**Yellow:** Answering questions on pictograms. The value of pictures is 2.

**Green:** Answering questions on pictograms. Some half pictures.
