

Summer Week 2 - Geography Lesson 3 Answers

Red answers:

Natural disasters are natural events that can cause a lot of harm to **people** and animals. In the USA, natural disasters have included **tornadoes, hurricanes, earthquakes and volcanic eruptions**. One of the worst tornadoes was the **Tri-State Tornado** in 1925. Hurricanes are common in the **south-east** the USA, in states like Florida and Louisiana. The worst hurricane in the USA so far was **Hurricane Katrina**, which is still affecting New Orleans today. Earthquakes can happen in California because of the **San Andreas Fault**. Volcanic eruptions are rare but there are 3 **active** volcanoes in the USA: **Kilauea, Mount St Helens and Mount Rainier**.

Key Words:

people

south-east

tornadoes, hurricanes, earthquakes and volcanic eruptions

Hurricane Katrina

Kilauea, Mount St Helens and Mount Rainier

Tri-State Tornado

active

San Andreas Fault
