

Year 4 Art Lesson 2

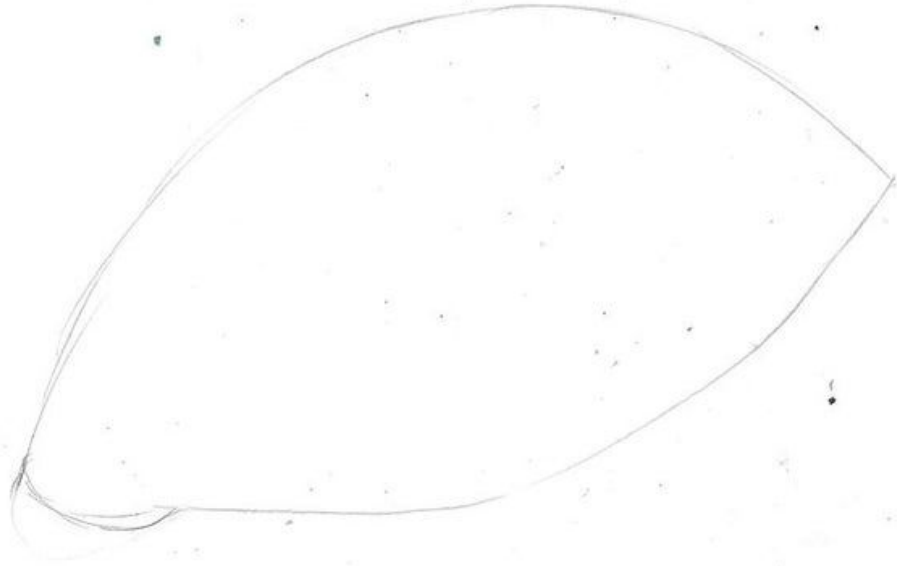

Can I draw an eye?

Using a mirror, study your own eye. Notice the shape and the other details
then, have a go at drawing it on some paper.

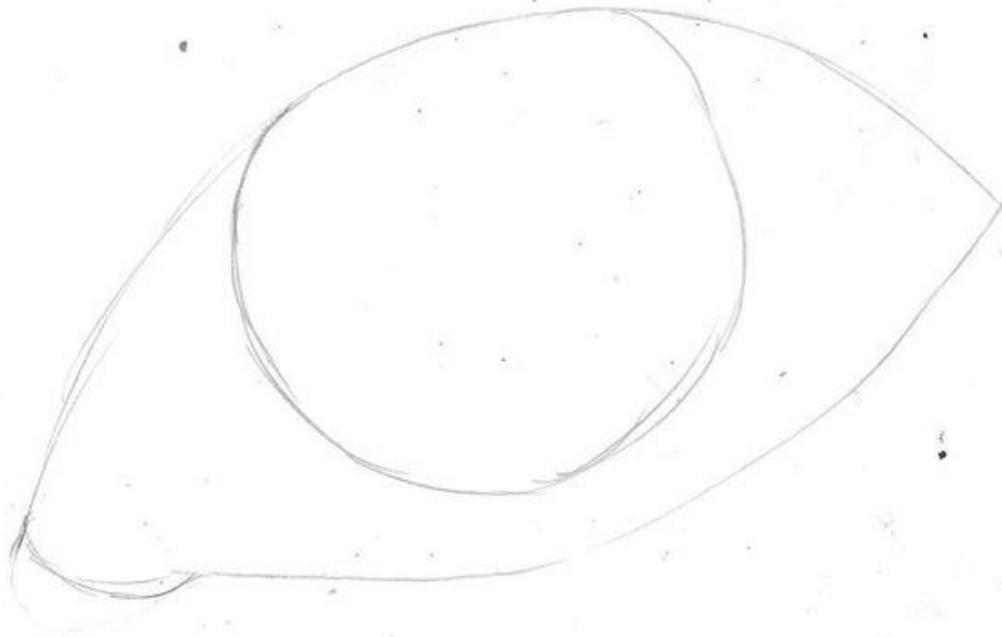

Did your sketch look like a real eye?
Carefully follow the next few slides to successfully
draw an eye

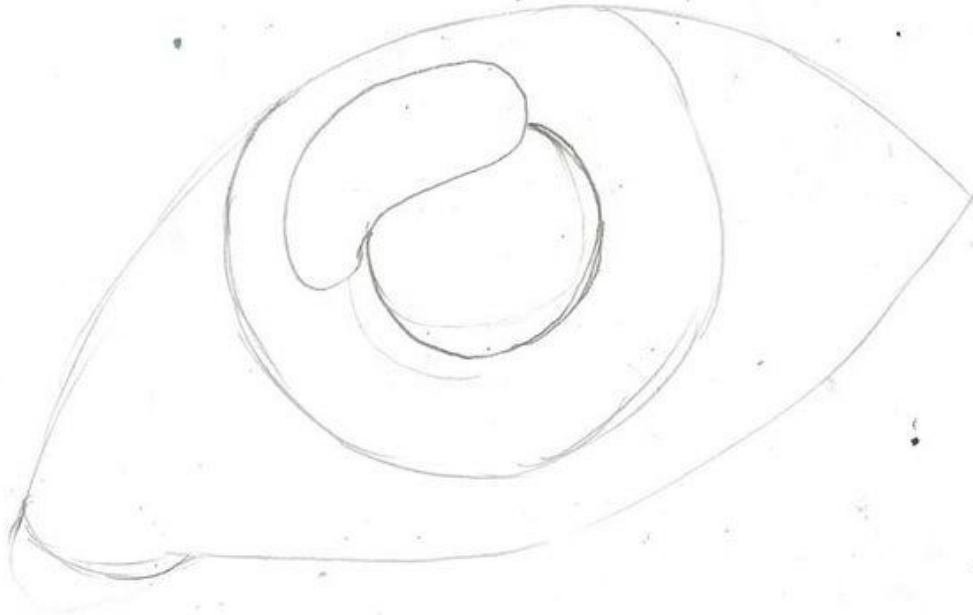

STEP 1: Okay, to start, draw the basic almond-shaped outline of the eye.

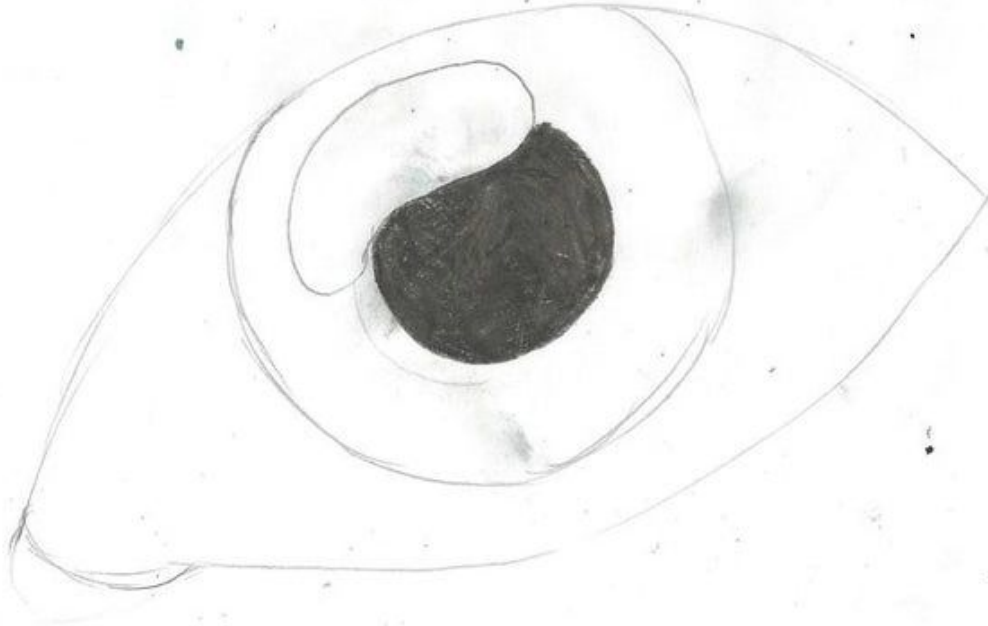

STEP 2: Now draw the inner circle of the eye.

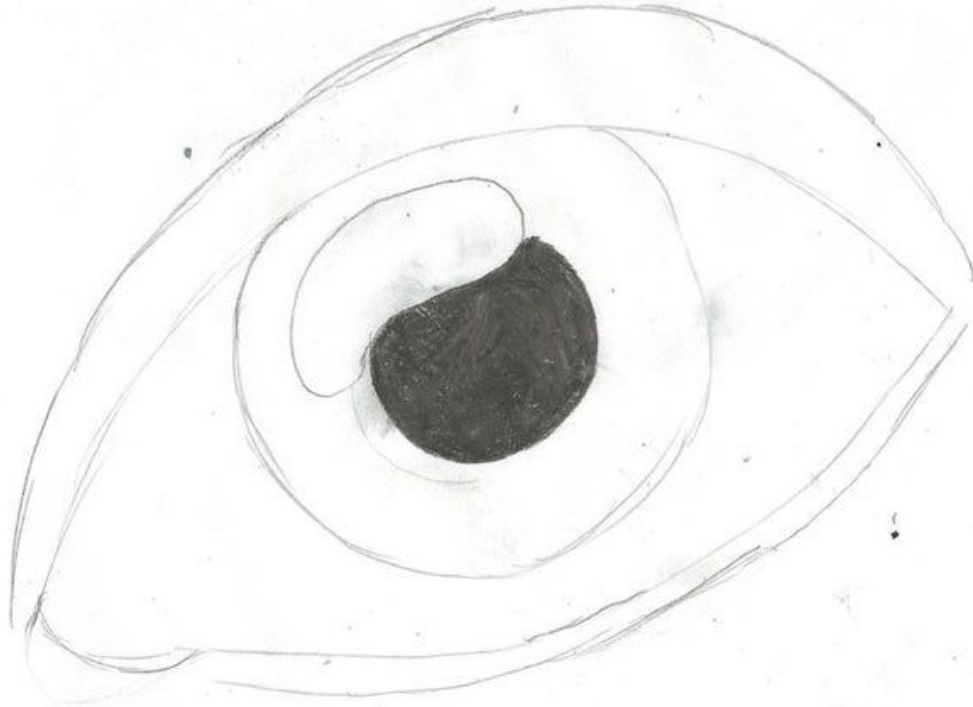

Step 3: Pupil (centre of eye) and highlight. Draw the highlight first, then the pupil under it. Make sure the pupil is in the center of the circle.

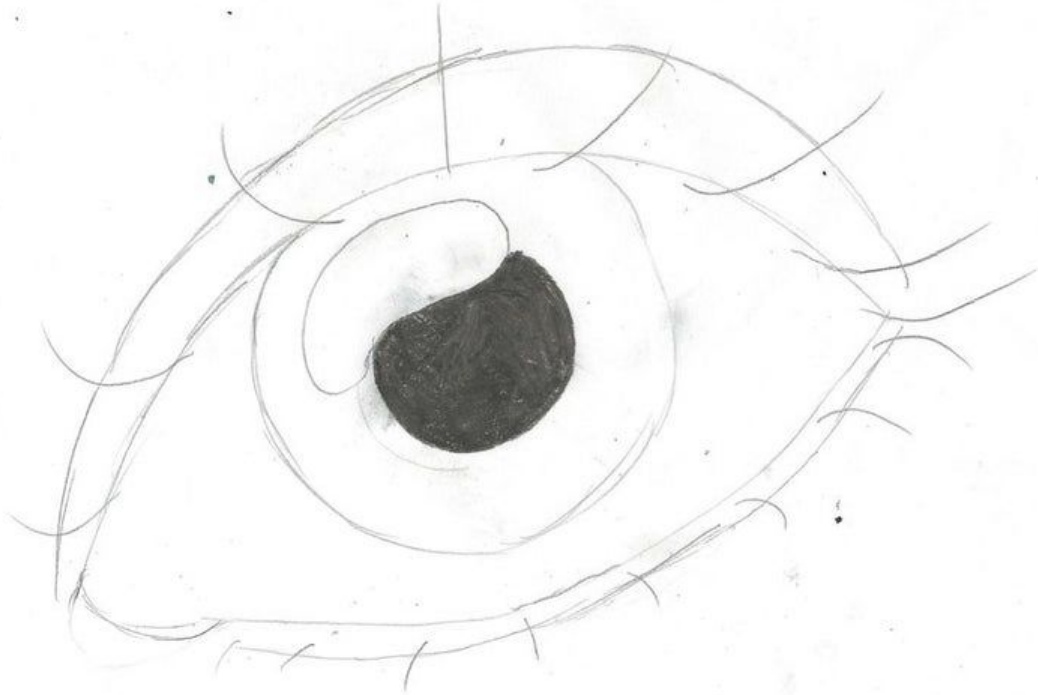

Step 4: Use your dark pencil to fill the pupil in. You want it as close to black as possible.

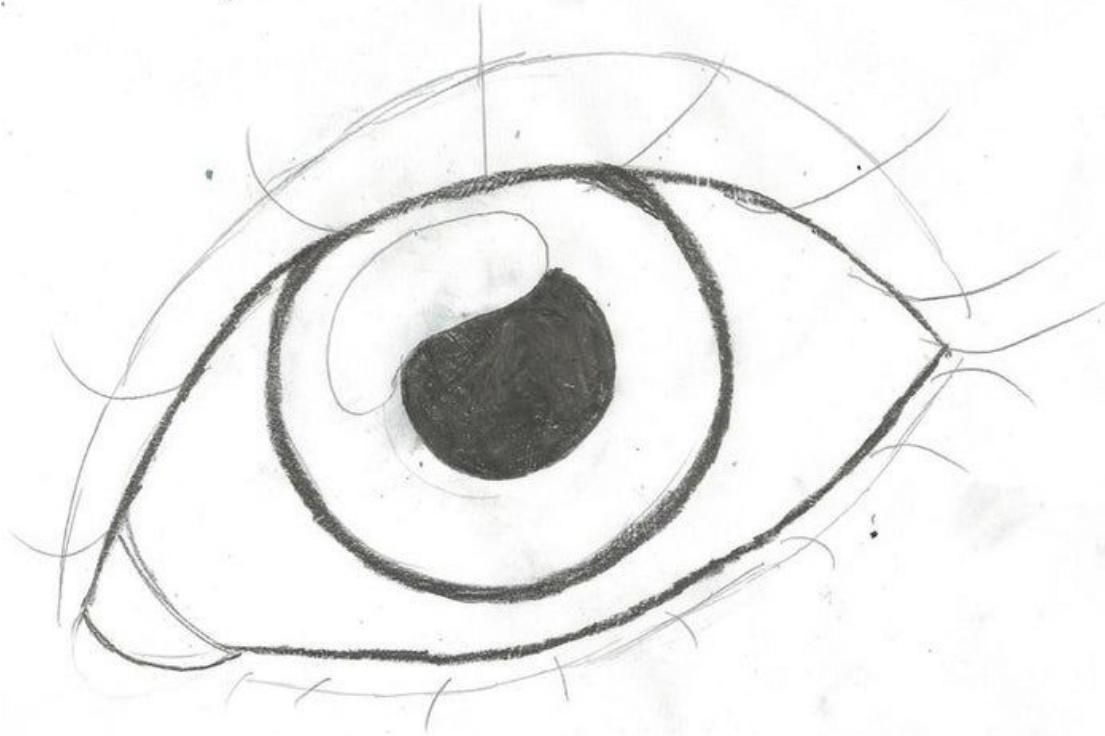

Step 5: Draw the crease of the upper eyelid, and the bottom one too.

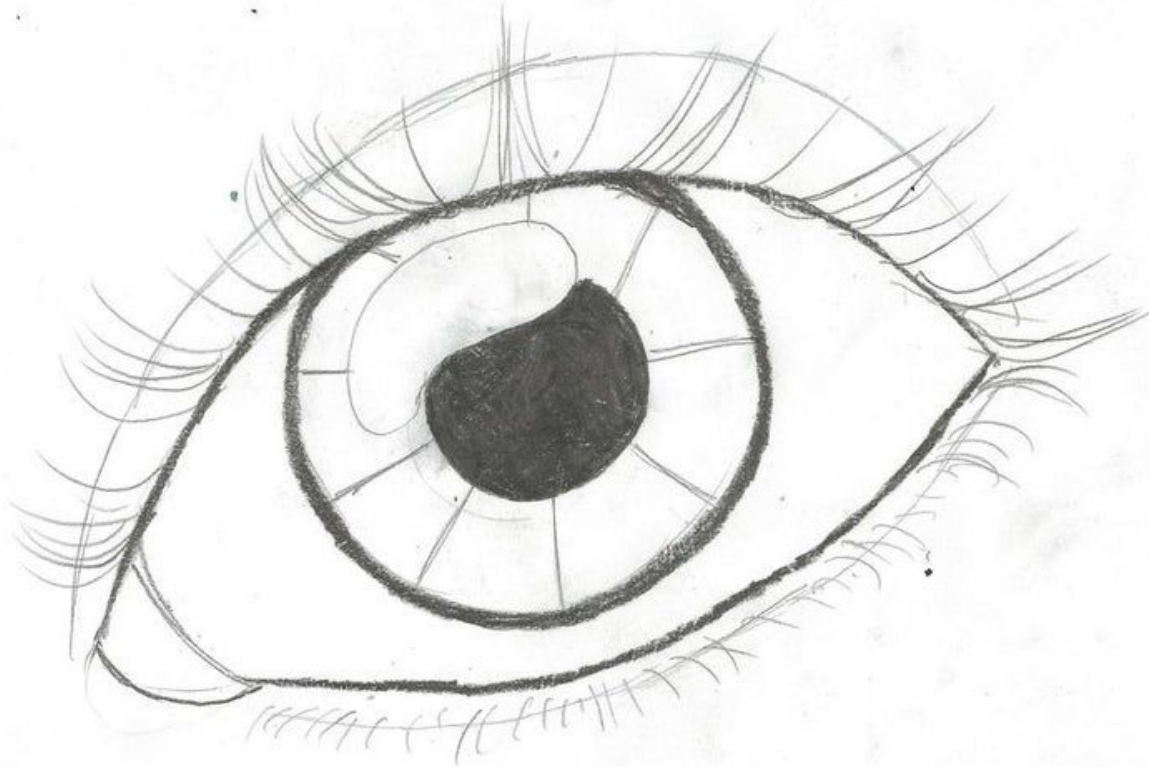

Step 6: Draw a few eyelashes to show where you will later draw in larger clumps of lashes.

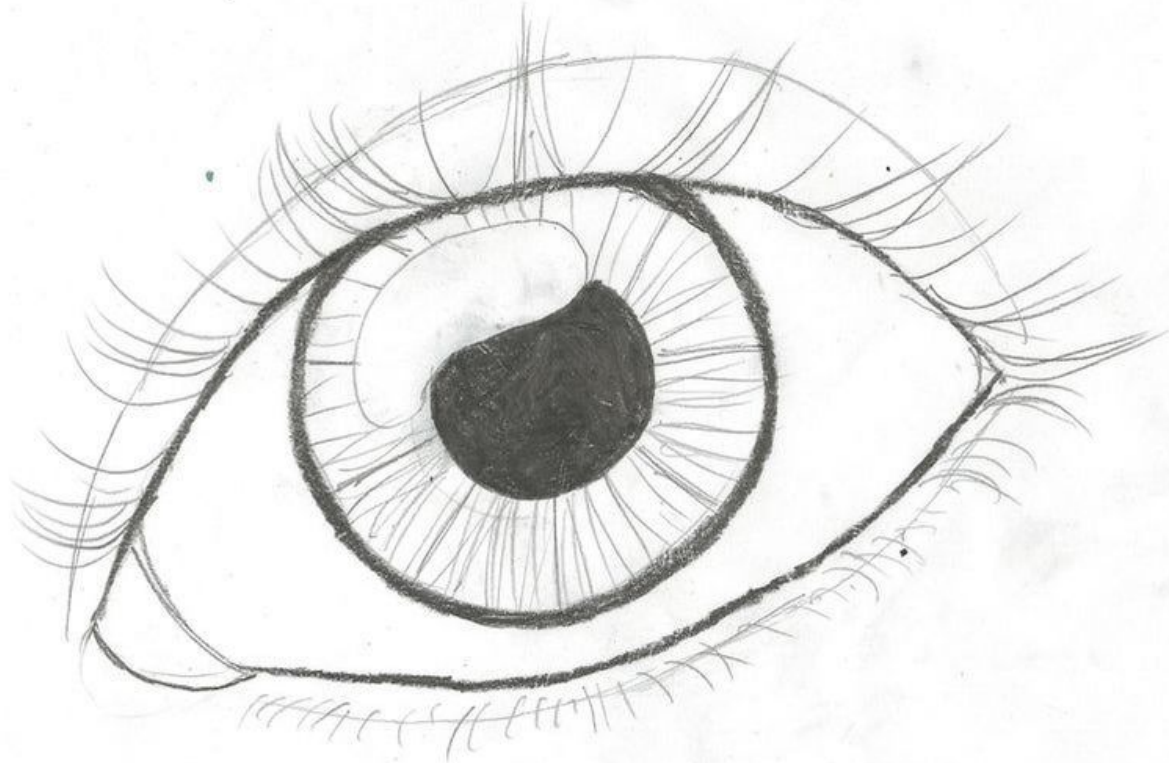

Step 7: Darken the inner circle in the eye, the outline of the eye, and draw a line in the inner corner .

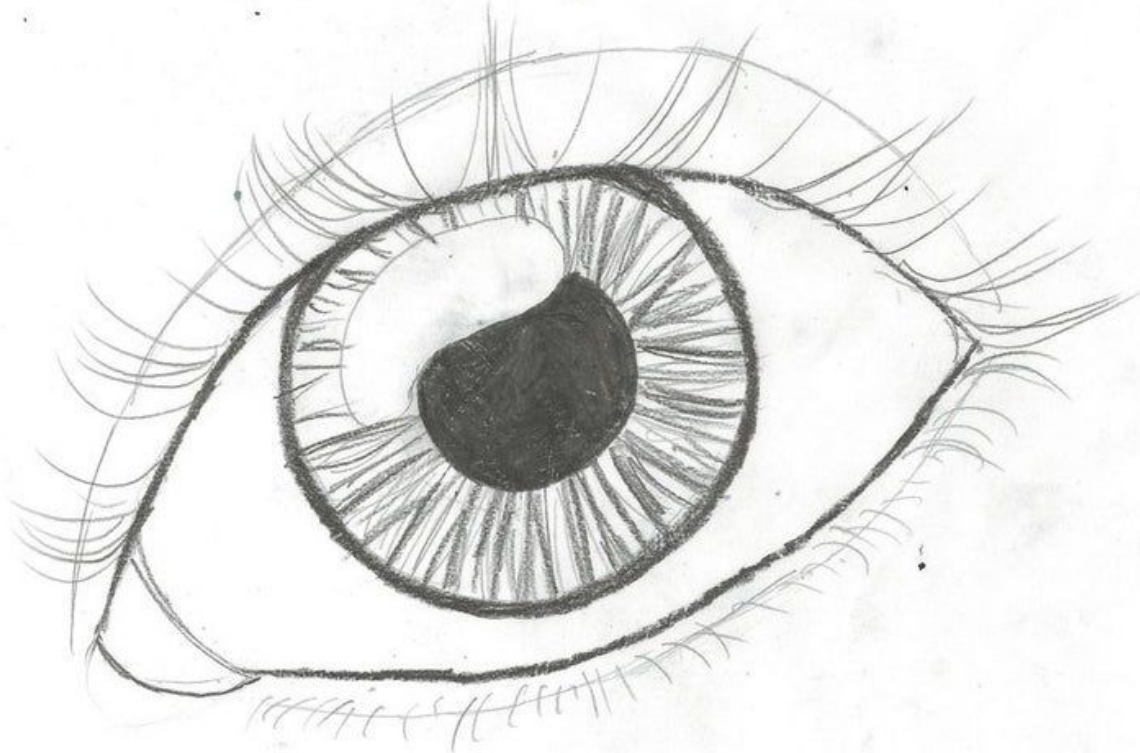

Step 8: Start filling in some more lashes, and add some lines inside the inner circle of the eye.

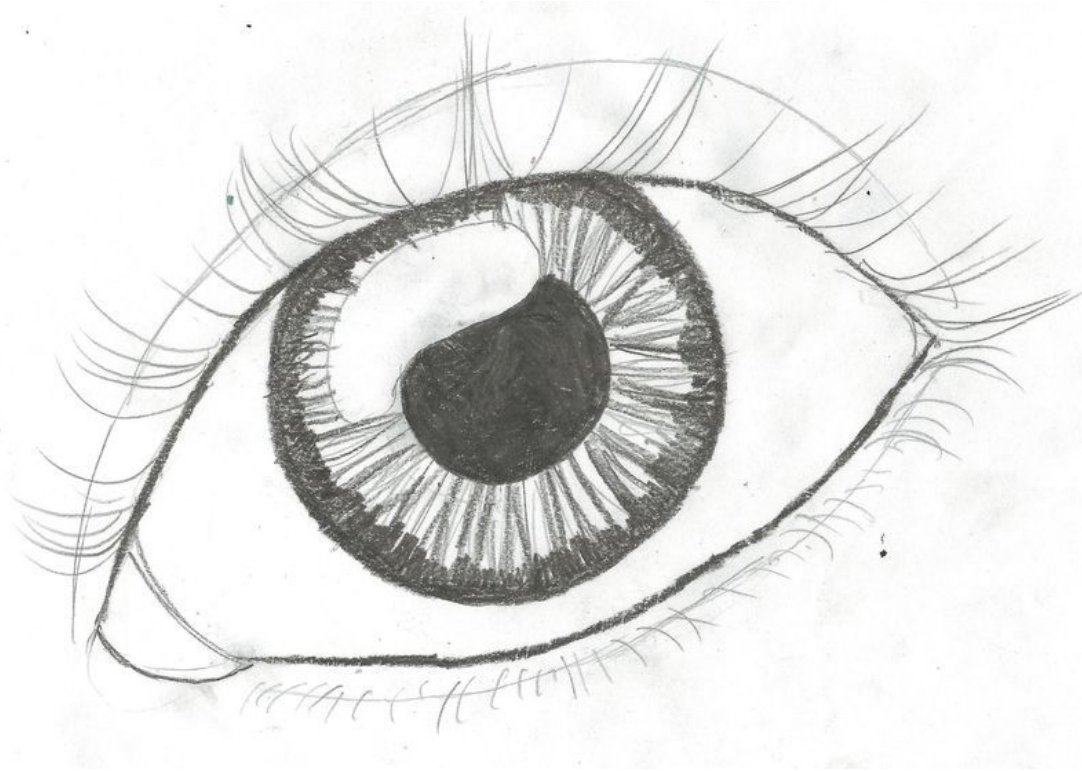

Step 9: Fill in some more lines lightly inside the circle

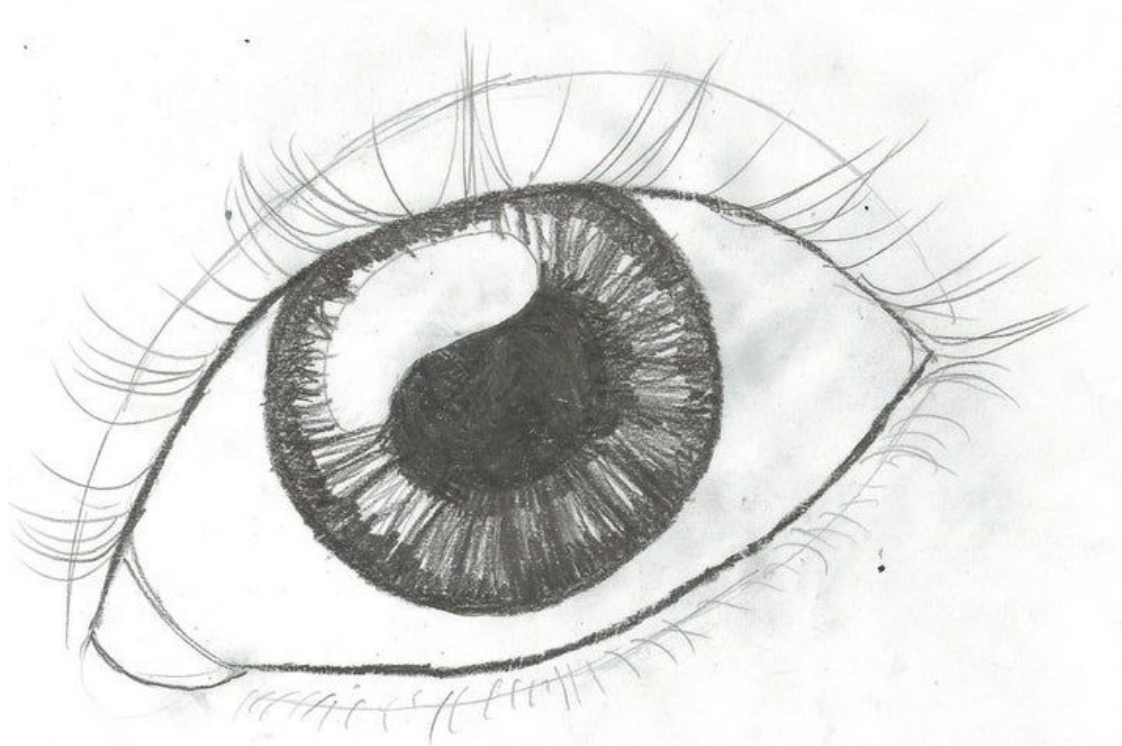

Step 10: Add even more lines! But this time press harder with the pencil to make darker lines.

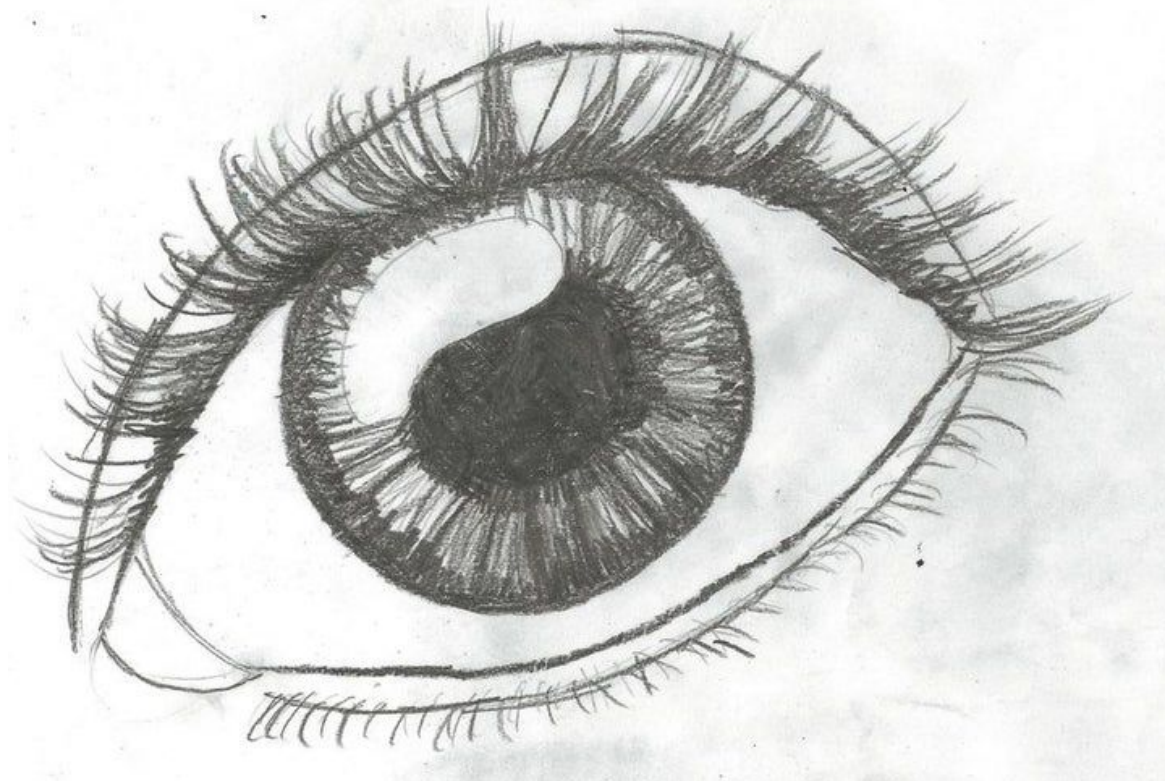

Step 11: Okay, shade in the inside outer edge of the inner circle of the eye . Press harder with the pencil. This will add a lot of depth and roundness to the eye.

Step 12: Alright, do what you did in the last step to the pupil. Also, add some more lines (depending on the lightness of the color of the eye) to make it a little darker in some areas.

Step 13: Now, really fill in the lashes with your darker pencil. If drawing a male eye, make the lashes a little lighter than if drawing a female eye.

Step 14: Shade inside the eye, and it helps to smudge it with your finger tip.
