

Can I solve any $3d + 3d$?

Fast five - answers are on the next slide!

1) What is half of 700?

2) $4801 - 544 =$

3) $450 \div 9 =$

4) What type of triangle is this?

5) $453 \times 7 =$

Fast five – answers

1) What is half of 700? **350**

2) $4801 - 544 =$ **4257**

3) $450 - 9 =$ **50**

4) What type of triangle is this?
Right-angled triangle

5) $453 \times 7 =$

When adding together two 3-digit numbers, we need to remember to use the column method.

By doing this, it helps to clearly lay out our working out and keeps the numbers with their correct place value.

$362 + 419 =$

		3	6	2
+		4	1	9

When adding together two 3-digit numbers, we need to remember to use the column method.

By doing this, it helps to clearly lay out our working out and keeps the numbers with their correct place value.

$362 + 419 =$

Once the numbers are in the correct positions, we add the numbers in each column!

When calculating the next column's addition, we need to also remember the ones that we carried over too!

$362 + 419 =$

	Th	H	T	O
		3	6	2
+		4	1	9
			8	1

$60 + 10 = 70$

$70 + 10 = 80$

We need to remember to add this onto the next addition!

$$362 + 419 = 781$$
