

## **Your task today**

### **Red Challenge**

Using the pictures and the completed table can you pick one animal from each sub-group and write the reason why that animal has been classified in the group.

E.g. Hippopotamus is in the sub-group mammal as it lives on land and spends up to 16 hours a day in the water. Hippos give birth to one live baby which they feed with milk.

If you need support there is a document with the facts about key features of each group to remind you.

### **Yellow Challenge**

Using the pictures and the completed table can you pick two animals from each sub-group and write the reason why that animal has been classified in the group.

E.g. Hippopotamus is in the sub-group mammal as it lives on land and spends up to 16 hours a day in the water. Hippos give birth to one live baby which they feed with milk.

### **Green Challenge**

Using the pictures and the completed table can you pick three animals from each sub-group and write the reason why that animal has been classified in the group.

E.g. Hippopotamus is in the sub-group mammal as it lives on land and spends up to 16 hours a day in the water. Hippos give birth to one live baby which they feed with milk.
