

Year 5 Summer 2 Week 9
Lesson 2

Can I interpret pictograms?

Fast Five - Answers on the next slide.

1. $37 \times 49 =$

2. How many vertices, edges and faces does this shape have?

3. $64 \div 4 =$

4. Find $\frac{1}{6}$ of 84

5. $\frac{2}{3} + \frac{1}{5} =$

Fast Five - Answers.

1. $37 \times 49 = 1813$

2. How many vertices, edges and faces does this shape have?

Vertices - 7

Edges - 12

Faces - 7

3. $64 \div 4 = 16$

4. Find $\frac{1}{6}$ of 84 = 14

5. $\frac{2}{3} + \frac{1}{5} = \frac{13}{15}$

What are pictograms?

Pictograms show information in the form of pictures. Each picture has a set value. We can see the information clearly and quickly with a pictogram.

PICTOGRAMS

Key:  means 1 child

| Fruit | Favorite Fruit |
|---|--|
|  apple |  |
|  banana |  |
|  strawberry |  |
|  pear |  |
|  grapes |  |

The key tells you how much each picture is worth.

In this pictogram, the picture showing an amount is a smiley face.

We can use this information to answer some questions.

PICTOGRAMS

Key: 😊 means 1 child

| Fruit | Favorite Fruit |
|---|----------------|
|  apple | 😊😊😊😊😊 |
|  banana | 😊😊😊😊😊😊😊 |
|  strawberry | 😊😊😊 |
|  pear | 😊😊 |
|  grapes | 😊😊😊😊 |

How many more children preferred bananas to strawberries?

7 children chose bananas and 3 children chose strawberries. We need to find the difference...

$$7-3=4$$

Favourite Fruit

Some pictograms have half a picture. This means they are worth half the full value.

A whole pear represents 2 children so half a pear represents 1 child.

Favourite Fruit

| | | | | | | |
|--|---|---|--|--|--|---|
| |  | | | | | |
| |  | | |  | |  |
| |  | | |  | |  |
| |  | | |  | |  |
| |  |  | |  | |  |
| | Banana | Grapes | | Apples | | Pears |

How many children liked apples and pears?

8 children like apples and 7 children like pears. We need to find the total...

$$8+7=15 \text{ children}$$

Favourite Fruit

How many more children liked apples than grapes? **Answer on the next slide.**

Favourite Fruit

= 2 children

= 2 children

= 2 children

= 2 children

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

Banana

Grapes

Apples

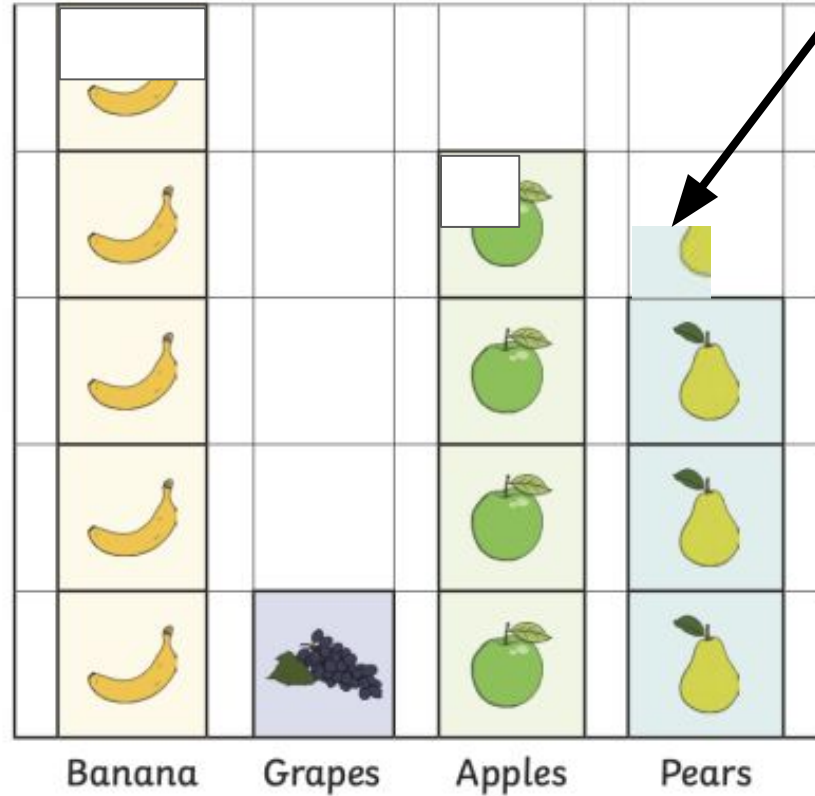

Pears

How many more children liked apples than grapes?

8 children like apples and 2 children like grapes. We need to find the difference...

$8-2=6$ children

Favourite Fruit

Some pictograms have quarter of a picture. This means they are worth $\frac{1}{4}$ of the full value.

A whole pear represents 24 children so a $\frac{1}{4}$ of a pear represents 6 children. We divide by 4!

Favourite Fruit

Some pictograms have three quarters of a picture. This means they are worth $\frac{3}{4}$ of the full value.

A whole pear represents 24 children so a $\frac{1}{4}$ of a pear represents 6 children. We divide by 4 then multiply that by 3. So $\frac{3}{4}$ is 18 children.

Favourite Fruit

= 24 children

= 24 children

= 24 children

= 24 children

| | Banana | Grapes | Apples | Pears |
|--|--------|--------|--------|-------|
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

How many children were asked in total?
Answer on the next slide.

Favourite Fruit

= 24 children

= 24 children

= 24 children

= 24 children

| | Banana | Grapes | Apples | Pears |
|--|--------|--------|--------|-------|
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

How many children were asked in total?
300 children

We add up the number of children from each vote.

Favourite Fruit

= 24 children

= 24 children

= 24 children

= 24 children

How many more children preferred bananas to apples?

Answer on the next slide.

Favourite Fruit

= 24 children

= 24 children

= 24 children

= 24 children

How many more children preferred bananas to apples?

18 children

Activity:

Red: Answering questions on pictograms. The value of pictures is 2.

Yellow: Answering questions on pictograms. Some half and quarter pictures.

Green: Answering questions on pictograms. Some half and some quarter pictures. Including $\frac{3}{4}$
